(a)
MSE boundary $S^\star_{\mathrm{MSE}}$ ($\rho_{\mathrm{th}} = 0.5$)
boundary $S^\star$ (symbols per step)
10^2
10^1
all four cases coincide
for $\mu \le 2^{-7.5}$
10^{-3}
10^{-2}
step size μ
$S^\star\mu = 0.11$
primary 14 dB
control 14 dB
primary 16 dB
control 16 dB
(b)
BER boundary $S^\star_{\mathrm{BER}}$ ($f = 2$)
boundary $S^\star$ (symbols per step)
10^3
10^2
10^1
10^0
no value:
10^{-3}
10^{-2}
step size μ
primary, 12 dB
primary, 14 dB
primary, 16 dB
$S^\star_{\mathrm{MSE}}$ law (for comparison)
filled: boundary resolved
hollow: conditional (reference-limited passes)
bar: inconclusive, bracket (resolved end)
dotted bar: bracket, reference-limited end
x: reference-limited, no value
